DEBEER REFINISH

8-145 HS SURFACER GREY

A NEW GREY SHADE FOR INCREASED PRODUCTIVITY

The colour of DeBeer Refinish 8-145 HS Surfacer Grey has been updated to GS907 Mid Grey. This change provides significant benefits for body shops, improving workshop productivity, these benefits are detailed below. Apart from the colour change, all other product features, including the part number remain unchanged.

BENEFITS OF THE NEW GREY SHADE

GS907 Mid Grey is the most commonly used grey shade. Depending on the basecoat colour, using GS907 Mid Grey removes one step from the topcoat process by removing the need for a shaded undercoat. The new grey shade therefore saves time in application and mixing. It also reduces material usage and in total boosts workshop throughput.

DeBeer Refinish 8-145 HS Surfacer is also available in 8-14510 White (GS903) and 8-14540 Black (GS905). These two colours may be mixed to create four additional grey shades giving a total of six primer shades. When mixing a topcoat colour, the ICRIS* Colour Retrieval system will reference the recommended grey shade formulation.

BENEFITS OF GREY SHADES

Grey Shades are used to ensure accurate colour reproduction in the topcoat colour. Use of the correct grey shade can improve basecoat coverage by up to 30%. Therefore fewer coats are required to achieve the perfect colour match, increasing application speed, productivity and profitability.

KEY FEATURES OF 8-145 HS SURFACER:

- Superior application properties
- High solids, high build
- Excellent hold out and fast curing
- Suited for sanding and non-sanding applications

ITEM CODE	PRODUCT DESCRIPTION (COLOUR)	SIZE
554181	8-145 HS Surfacer Grey (GS907)	3L
554180	8-145 HS Surfacer Grey (GS907)	1L
554191	8-14510 HS Surfacer White (GS903)	3L
554193	8-14540 HS Surfacer Black (GS901)	3L

AEROSOL GREY SHADE PRIMER: FOR SMALL REPAIRS

A series of grey shade aerosol primers are also available to complement 8-145 HS Surfacer range. Aerosol primers are well suited to carrying out small repairs including sand through edges and spot repairs. The 400mL aerosol primers are available in three shades: White (GS903), Light Grey (GS905) and Mid Grey (GS907).
