

INSTALLATION INSTRUCTIONS

FRONT PLOW MOUNT KIT

Part Number: 91280

Application: Polaris Sportsman 400, 500, 800

GENERAL SAFETY PRECAUTIONS

Your safety, and the safety of others, is very important. To help you make informed decisions about safety, we have provided installation and operating instructions and other information on labels and in this guide. This information alerts you to potential hazards that could hurt you or others. It is not possible to warn you about all potential hazards associated with this product, you must use your own good judgment.

CARELESS INSTALLATION AND OPERATION CAN RESULT IN SERIOUS INJURY OR EQUIPMENT DAMAGE. READ AND UNDERSTAND ALL SAFETY PRECAUTIONS AND OPERATING INSTRUCTIONS BEFORE INSTALLING AND OPERATING THIS PRODUCT.

This guide identifies potential hazards and has important safety messages that help you and others avoid personal injury or death. **WARNING** and **CAUTION** are signal words that identify the level of hazard. These signal words mean:

▲ **WARNING** signals a hazard that could cause serious injury or death, if you do not follow recommendations. ▲ **CAUTION** signals a hazard that may cause minor to moderate injury, if you do not follow recommendations.

This guide uses **NOTICE** to call attention to important mechanical information, and **Note:** to emphasize general information worthy of special attention.

▲ **WARNING**

IMPACT AND MOVING PARTS ENTANGLEMENT HAZARD

Failure to observe these instructions could lead to severe injury or death

- Always Read the Plow Operator's Manual, the Winch Operator's Manual and all warning labels before operating.
- Always use extreme caution when drilling on any vehicle. Make sure that all fuel lines, brake lines, electrical wires, and other objects are not punctured or damaged when/if drilling on the vehicle. Thoroughly inspect the area to be drilled (on both sides of material) prior to drilling, and relocate any objects that may be damaged. Failure to inspect the area to be drilled may result in vehicle damage, electrical shock, fire or personal injury.
- Always wear safety glasses when installing this kit. A drilling operation will cause flying metal chips. Flying chips can cause eye injury.
- Always use extreme caution when cutting and trimming during fitting.
- Always remove jewelry and wear eye protection.
- Never lean over battery while making connections.
- Never route electrical cables:
 - o Across any sharp edges.
 - o Through or near moving parts.
 - o Near parts that become hot.
- Always insulate and protect all exposed wiring and electrical terminals.
- Always install terminal boots as directed in installation instructions.
- Always use appropriate and adequate care in lifting components into place.
- Always insure components will remain secure during installation and operation.
- Always tighten all nuts and bolts securely, per the installation instructions.
- Always operate the vehicle at a walking speed with the blade installed. Never exceed 5 mph (8 km/h), even with blade up.
- Always plow cautiously, impact with hidden or stationary object may cause the vehicle to stop suddenly or go out of control.
- Never operate the vehicle on slopes greater than 10 degrees with the plow installed.
- Never stand or ride on the plow.
- Always stay clear of moving parts and joints. Always keep others away when operating or adjusting plow.
- Always perform regular inspections and maintenance on the plow mechanism, fasteners, cable and related hardware.
- Always replace all worn or damaged parts before operating.
- Never operate this WARN product with damaged or missing parts.
- Always drive slowly over bumpy and rough terrain. Driving at speeds that cause the plow to bounce while in the up position can cause the winch to back-drive, causing the plow to work its way down. This may result in the plow impacting a stationary object and cause damage to the vehicle and operator injury or death.
- Always drive at speeds such that the plow does not bounce and be aware of the plow position while driving at all times.
- Always be aware that the purpose of the j-bolt is to break the connection between the plow and the winch, to prevent serious damage to the ATV if the plow is raised too high. The plow blade will drop suddenly if the j-bolt breaks, so always be sure there are no bystanders when you raise and lower the plow.
- Never raise the top of the plow above the headlights of the ATV, as it may damage the vehicle and plow.
- Always replace a deformed or broken j-bolt with the spare j-bolt included in the kit.

Read installation and operating instructions thoroughly.

WARN INDUSTRIES, INC. 12900 S.E. Capps Road,
Clackamas, OR USA 97015-8903, 1-503-722-1200, FAX: 1-503-722-3000

⚠ CAUTION

MOVING PARTS ENTANGLEMENT HAZARD

Failure to observe these instructions could lead to minor or moderate injury

- Always take time to fully read and understand the installation and Operations Guide included with this product.
- Never operate this product if you are under 16 years of age.
- Never operate this product when under the influence of drugs, alcohol or medications.

Read installation and operating instructions thoroughly.

NOTICE

EQUIPMENT DAMAGE

- Always refer to the Installation and Specification Guide, supplied in the winch kit, for all wiring schematics and specific details on how to wire this WARN product to your vehicle.
- Never overtighten the j-bolt to the bracket. Doing so will pinch the winch cable against the bracket, damaging the cable.
- Always put the end of the actuator cable through the slot in the Termination Bracket. Terminating the cable through any other hole in the bracket will cause the bracket to not function properly and will drastically reduce the life of the actuator cable.

Read installation and operating instructions thoroughly.

BEFORE YOU BEGIN

- Always Read the Plow Operator's Manual, the Winch Operator's Manual and all warning labels before operating.
- Always use extreme caution when cutting and trimming during fitting.

TABLE OF CONTENTS

Tools Required.....	page 2
Torque Specifications.....	page 2
Parts List.....	page 3
Installation.....	page 4-6
Maintenance/Care.....	page 6

TOOLS REQUIRED

- 13mm socket and end wrench
- 1/2" socket and end wrench
- 3/8 Drive Ratchet

TORQUE SPECIFICATIONS

1/4 (6mm)	8 lb. ft. (10.8 N-m)
5/16 (8mm)	17 lb. ft. (12.5 N-m)
3/8 (10mm)	30 lb. ft. (40.7 N-m)
7/16 (11mm)	50 lb. ft. (67.8 N-m)
1/2 (13mm)	75 lb. ft. (101.7 N-m)

PARTS LIST

Reference	Part Number	QTY	Description
A1	91279	1	Plow Mount Assembly
A2	91272	1	Left Brace
A3	91273	1	Right Brace
A4	79225	1	Left Plow Bracket
A5	79226	1	Right Plow Bracket
B1	21331	2	5/16-18 x 1" bolt
B2	1324	2	5/16" washer
B3	1402	2	5/16" lock washer
B4	78648	2	M8 x 20mm flange bolt
B5	65970	4	M8 x 25mm flange bolt
B6	71588	6	M8 flange nut
B7	79712	2	Retaining Pin
C1	Not included	1	Winch Mount

INSTALLATION INSTRUCTIONS

1. Remove lower front bumper plastic cover.

Figure 1

2. Remove the two bolts shown.

Figure 2

3. Remove the lower winch mount fasteners shown in figure 3.

Figure 3

INSTALLATION INSTRUCTIONS

- Place the plow mount assembly (A1) into position and install lower fasteners (B1, B2, B3) as shown in figure 4. Do not tighten fasteners at this time.

Figure 4

- Install upper fasteners (B4, B6) as shown in figure 5. Do not tighten at this time.

Figure 5

- Install left and right braces (A2, A3) using fasteners (B5, B6) as shown in figure 6.

Figure 6

7. Tighten all fasteners to torque specification supplied.

8. Install bumper cover, removed in step 1. Note lower edge of plastic may need to be trimmed to allow more access for the plow flanges when installing plow to vehicle mount.

9. Install left and right plow bracket (A4, A5) to plow push tube assembly. Note: the brackets are installed to the inside of the push tube tabs. See figure 7.

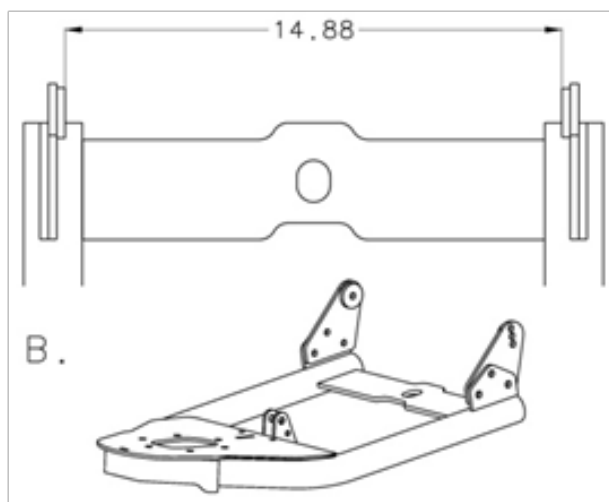

Figure 7

MAINTENANCE / CARE

1. Inspect all parts on the plow, plow mount, and related hardware prior to each use. Replace all hardware that appears rusted or deformed.
2. Inspect all nuts and bolts on the plow, plow mount, and related hardware prior to each use. Tighten all nuts that appear to be loose. Stripped, fractured, or bent bolts or nuts need to be replaced.
3. Check all cables prior to use. Replace cables that look worn or frayed.
4. Check all moving or rotating parts. Remove debris that may inhibit the part from moving freely.
