

Range extender

RAPTOR SR

DESIGNED FOR YUNEEC H520

Range extender **RAPTOR SR**

DESIGNED FOR YUNEEC H520

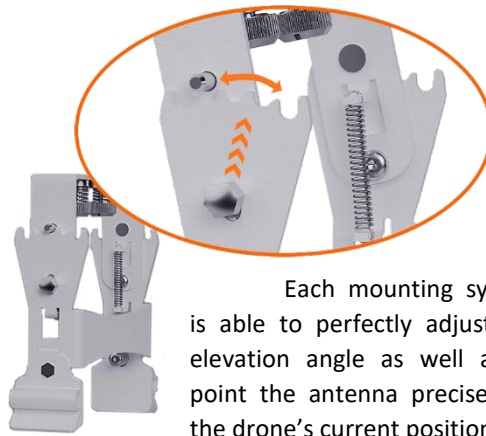

INCREASE DRONE'S FLIGHT RANGE

Raptor range extenders have been designed to increase your drone's flight range, making it even more enjoyable than ever before. All that with a crystal clear video and a very long range that is limited only by your battery.

ADJUSTABLE TILT OF THE ANTENNA

Each mounting system is able to perfectly adjust the elevation angle as well as to point the antenna precisely to the drone's current position.

BREAK PERFORMANCE LIMITS

Directional antenna allows for an uninterrupted drone flight, free from any interference and noises originating from other devices or networks.

CRYSTAL CLEAR VIDEO

Thanks to 4Hawk' Raptor antenna performance, your screen is free from glitches that in standard equipment might result in unclear picture on your screen.

ALL ACCESORIES INCLUDED

The entire set is comprised of antenna, dedicated mounting system, pigtails and other required tools to modify your controller.
