

A Nordic design tradition

The Nordic design is reflected in its simple, organic lines and the choice of textile. Contrasts interplay with each other; the warm, rough 'look and feel' of the textile against the smooth aluminium frame. The discretely embossed logo and embroidered volume buttons complement the understated look.

Premium Materials

A collaboration with Kvadrat, Europe's leading manufacturer of design textiles, is one of the more important components to the look, feel and sound of the Vifa loudspeakers. All models carry a special-woven textile cover, giving the product a warm, rough look and feel, without compromising the sound; the **textiles have been designed to let sound pass through the threads in the best possible way.**

"The coolest combo of music and soul"

Key selling points

Small Bluetooth speaker superior sound performance. 3 speaker drivers. Will please your ears for many hours.
